

Interventional Procedures Performed

I. Airway Procedures

Flexible Fiberoptic

1. Routine bronchoscopy
2. Tracheostomy changes
3. Advanced bronchoscopy
 - Endobronchial Ultrasound for diagnosis and staging of cancer
 - Brachytherapy catheter insertion
 - Metallic Stent Deployment
 - Balloon Dilatation
 - Fogarty Catheter Insertion
 - Argon plasma coagulation
 - Mechanical tumor destruction
 - Foreign body removal

II. Pleural Procedures

1. Medical thoracoscopy with pleural biopsy and pleurodesis
2. Pleur-X (indwelling catheter) insertion for palliative care
3. Thoracentesis with ultrasound guidance
4. Chest Tube insertion
 - Heimlich valve
 - Pigtail catheter
5. Sniff Test for diaphragmatic paralysis

III. Critical Care Procedures

1. Right heart catheterization
 - with vasoreactivity studies
 - without vasoreactivity studies
2. Percutaneous Tracheostomy (bedside)
